Latex Lab 1

Carlos

June 2, 2019

1   Introduction

In this lab, I put into practice the basic commands of Latex learned in chapter 1 and the beginning of chapter 2.

The text I use to do this lab, was taken from sites randomly in order to make use of the acquired knowledge of Latex.

2   Gutenberg Welcome

Project Gutenberg offers over 59000 free ebooks. Choose among free epub and Kindle eBooks, download them or read them online. You will find the world's great literature here, with focus on older works for which U.S. copyright has expired. Thousands of volunteers digitized and dilifently proofread the eBooks, for enjoyment and education.

3   Debian Operating System

Debian is a very successful operating system, which is pervasive in our digital lives more than people often imagine or are aware of. A few data points will suffice to make this clear. At the time of writing Debian is the most popular GNU/Linux variant among web servers: according to **_W3Techs_**, more than 10% of the web is Debian-powered. Think about it: how many web sites would have you missed today without Debian? Onto fascinating deployments, Debian is the operating system of choice in the International Space Station. Have you been following the work of ISS astronauts, maybe via the social network presence of *NASA* or other international organizations? Both the work in itself and the posts about it have been made possible by Debian.
